ANY visitor to Alderson this year would certainly remark on the beautiful gardens that the town possesses, both vegetable and floral. Last week at the Great West the editor had his "fill" of splendid corn on the ear from the garden of one of our subscribers. This is really no hint we like corn. Certainly not. Another party, a local lady, who occasionally visits our san-tum sanctorium presented us with a fine bouquet of variegated sweet peas. We do not care for them either, oh no! Any readers who care to come in and renew their subscription is at liberty to view them.

PAY your taxes. We have almost scraped our own together.

WHEN you haul your first load of grain into Alderson drop in at the News and leave \$1.50 for a year's subscription.

An Empress Druggist's Idea of A Fox Terrier

The fox terrier is a small black and white disturbance which afflicts and delights many families. He is active and beautiful, like a college sophomore, and has the sophomoric habit of starting a new variety of trouble on a second's notice. The fox terrier is a house pet and is clean and dainty in his habits. He lives on meat, milk, potatoes, mice, old shoes, curtains, books, mahogany table legs, opera hats, and tablecloths. In street cars, in public places, in the house with unremitting ferocity. No burglar can come within a block of a fox terrier's family without dislodging an eruption of larks, howls, whines, shrieks, and sniffs from the faithful brute. He also guards the house against all cats, dogs, street cars, late pedestrians, bats, owls, dead leaves, and moonbeams which chance to pass the place at night. After a family has got used to a fox terrier and has lost him temporarily, it can sleep right through a boiler explosion and a fire next door without so much as stirring.

Losing the fox terrier is the favorite diversion of the family which owns him—or at least pays the taxes on him. He is as difficult to keep around the house as a husband. The ordinary fox terrier has a larger acquaintance around the town than the postmaster, and dines at a new place every day. Some terriers board around like school teachers, and come home only once a year to be tugged. Owing to his wandering disposition the terrier is loved twice as much as ordinary dogs. He is fanatically welcomed when he returns home and the family is grateful and gives it a rest. Very few people have seen a fox terrier die, because he almost always loses himself for keeps first.

The fox terrier is vivacious, audacious, ingenious, mercenary, hysterical, wheelsermon, companionable, affectionate, optimistic, flexible, restless, and irresponsible. He is in fact the main sequence of the "arg" family.—The Empress Express.

HARVEST IN FULL SWING

Harvest in Western Canada may now be said to be on in full swing. While cutting has not yet started in all districts, it is only a matter of days until the hum of the binder will be heard on every farm, and the rush of harvest activities is everywhere noticeable everywhere. Weather has continued favorable since last week, and grain is filling and ripening rapidly. The demand for binder twine is also unprecedented, but the supply appears to be sufficient. Buy an Irrigated Farm

FROM THE CANADIAN PACIFIC RAILWAY

BECAUSE

Irrigation makes the farmer independent of rain and insures good crops, not occasionally, but every year.

Irrigation makes possible the successful culture of alfalfa, the king of forage, which insures best returns in dairying and mixed farming.

Irrigation means intensive farming and close settlement with all the advantages of a densely populated agricultural community.

Irrigation in the Canadian Pacific Railway Irrigation Block is no longer an experiment, the year 1914 having absolutely demonstrated its success wherever intelligently applied.

You can buy irrigated land from the Canadian Pacific Railway at prices ranging from \$35 to \$75 per acre, with twenty years' pay and the privilege of a loan of \$2,000.00 for improvements (6% interest); no principal payment at the end of first and second years and no water rental for first year. Assistance is also given in supplying stock in approved instances.

This is the most liberal offer of irrigated farm land on record

UNDER-HAND FIGHTING

University Writers' Criticisms of
"Made-in-Canada" is Superficial

"Show me a man who puts up a 'Made-in-Canada' placard and I will show you a man who hopes to increase his own private and personal profit at your expense or mine, out of the movement."

The above extract is taken from an article signed "B.L." and occupying an editorial or a semi-editorial position which appeared in the April issue of the "University Magazine," a review which is published in Montreal and circulated chiefly among university graduates.

Throughout Canada, at the present time, there are thousands of "Made-in-Canada" placards displayed in the most important manufacturing, wholesale and retail establishments. In the advertisements and on the products of our leading manufacturers, whose reputations are national, and in many cases, international, the words "Made-in-Canada" appear. It is quite true, of course, that these "Made-in-Canada" placards and advertisements are intended to promote the sale of Canadian goods and, consequently, to yield legitimate profits to those who make and sell the goods; but "B.L." sees great wickedness in this and seems to infer that Canadian goods should be sold at cost or, better still, at a loss. Are we to assume that "Made-in-Canada" goods were formerly sold in Canada without any regard for "private and personal profit" to those who made them, or that goods made in other countries are now being sold in Canada for similar disinterested motives?

Admitting that manufacturers and dealers who advocate the "Made-in-Canada" policy hope to derive personal benefit from it, which no reasonable person thinks of denying, surely they can also be given credit for a broader interest in the success of the movement and for entertaining the belief that the adoption of the policy will be of great advantage to other classes as well as to themselves.

CANADIAN RAILS IN UNITED STATES

United States Manufacturers Resist
Entry of Canadian Rail Mills in
American Markets

During recent years huge quantities of railway materials have been imported from United States into Canada to assist in the construction of the vast railway enterprises of this country. While the movement of railway supplies across the line from United States has ceased temporarily, owing to the general business depression, there is no doubt that in normal times Canada will continue to buy great quantities of materials of this nature in United States.

Canadian Mills

Up to the present, times Canadian rail mills have been able to run to full capacity on Canadian orders, but since the temporary cessation of activity in Canada they have lost so much business that they had to depend on the Canadian demand; they would be forced to close down, or, perhaps, in some cases, go into liquidation. The alert and energetic managers of these Canadian mills saw an opportunity of securing business, at least at low prices, in United States, and a few months ago the steel mill at Sault Ste. Marie (Soudar) successfully won a big order for large American railroads. Since then they have secured additional business in United States, and other Canadian mills have followed suit.

"E's and T's"

"The Manufacturers' News" of Chicago referring to this business recently stated that "Some criticism has followed the reconnection of the Illinois Central Railroad because it placed an order for 30,000 tons of rails with the Algoma Steel Company of Canada."

"The order was for open hearth rails and the price was \$17 a ton delivered at Chicago. This was \$3 a ton cheaper than prices usually quoted by American mills for the same rails."

"How much freight do the railroads of the United States receive upon rails manufactured in Canada?"

"If all the railroads in Canada had rails in Canada because they could obtain them at \$2 a ton cheaper than what some of our worst iron and steel manufacturers would give?"

"And what would become of our railroads?"

Some Canadians in the past have complained about the "Made-in-Canada" movement, and particularly about the national policy which encourages Canadian manufacturing industries. They would do well to reflect on the attitude of the people of United States with respect to the purchase of rails from Canadian manufacturers. There must be a certain amount of give and take in matters of trade. If Canada is to keep on purchasing huge quantities of manufactured goods from United States, the people of United States, particularly the manufacturers, must be prepared to allow Canadian manufactured goods to be sold in United States where Canadian firms can compete on favorable terms.

An American Protest

The Wall Street Journal, probably the leading financial paper in United States also views with disfavor the following recent sale in addition to the Illinois Central order: Pere Marquette, 5,500 tons; New York Central, 2,500 tons; Rocking Valley, 4,000 tons; Toledo Terminal, 500 tons; Northern Ohio Traction, 500 tons; miscellaneous, 10,000 tons. "Canadian rails," says the Journal, "which have been subsidized by the Government, are prohibited from buying their rails from a foreign maker unless the Canadian mills are filled up. As this very rarely occurs, the United States gets very few orders of this kind." To refute this statement it is only necessary to consult the Customs returns for the year ending March 31st, 1914, showing Canada's purchases of rails from the United States for the year to have been \$4,561,181. During the ten months of the present year, when our mills had little to do, we purchased \$677,586 worth of rails from the United States. When the News and Journal recall the past huge purchases of Canada in the United States, surely they can regard the present limited purchases of the United States in Canada without envy.

Who are the people that buy the products of your labor, and thus keep you employed and prosperous? Are they not Canadians? Do you in turn buy goods "Made-in-Canada?"

These Canadians on whose patronage your own prosperity depends?

Keep Canadian money at home where you can share in the good business it will create! Buy goods "Made in Canada."

Halt! Attention!

PROOF OF THE FACT CELEBRATION

WONDERFUL UNANIMITY OF TWO GREAT NATIONS

Peace will be Somewhat Curtained Owing to the War, But when War is Over a Large Festival will be Held

Owing to the war the program of the forthcoming celebration in connection with the hundred years of peace between Great Britain and the United States has been somewhat modified. This decision has been reached after consultation between the leading men responsible for the preparations. The main idea of a great union could it did not appear seemly that public rejoicings should be encouraged. The part of the program accordingly has been postponed till a more convenient season. When the war is over and peace more reign throughout Europe, the festivities will be held on a scale that will give full vent to the feelings of joy toward the great republic to the south, and will give full vent to the feelings of relief that the most terrible war in the world's history has been brought to a close.

The Canadian Peace Centenary association—which, by the way, is not and never has been a "Peace Society"—has just issued a statement which sheds an interesting light on the conduct of international relations after the war. The statement says that the main idea of a great union could it did not appear seemly that public rejoicings should be encouraged. The part of the program accordingly has been postponed till a more convenient season. When the war is over and peace more reign throughout Europe, the festivities will be held on a scale that will give full vent to the feelings of joy toward the great republic to the south, and will give full vent to the feelings of relief that the most terrible war in the world's history has been brought to a close.

Prices Still Higher Seasonable Hints

Cost of Living Has Gone Up Since the

The annual report of the department of labor on prices of wholesale commodities for the year 1912 shows that the "factor which chiefly affected the advance in prices during 1912 was the war." The report states that the cost of living was 14.14, was the highest recorded by this department since 1891.

The chief increases for the year as a whole appeared in the following: cereals, 8 per cent; meat, 10 per cent; animal and meat, 10 per cent; coal, 10 per cent; oil, 10 per cent; drugs and chemicals, 7 per cent; and food, 10 per cent. Farmer-Banker Years No Test of Co-Operation

Age says Physician

Future Industrial Prosperity Depends on Co-Operation, Says American Paper

A farmer-banker conference has no ordinary significance at this time. It is a meeting of the minds of two men who must public opinion up to date. Free and easy, willing to be a banker, and a farmer, must put their heads together for the future. The enormous advantages of co-operation are being realized in the country at large as well as in the city. It is to be supposed for a second that Great Britain will be able to get on at the end of the war in the face of the trade machine that the German government has perfected.

Co-operation has Americans have no unanimously talked about and so generally neglected has now become a necessity. Business men, producers, and consumers must organize if the United States is to be in a position, in proportion to its size, riches, ability and resources. In the age of world co-operation an exaggerated sense of individualism is a handicap. When America was a young nation, when the farmer and the farmer individualism was a practical and natural law. Now the farmer is being led by the hand, and the farmer individualism is being replaced by the farmer co-operation. The farmer co-operation is being replaced by the farmer co-operation. The farmer co-operation is being replaced by the farmer co-operation.

Remington JUNIOR Typewriter

HERE is the typewriter for which you have been waiting. Here
is a first-class typewriter, a genuine Remington Typewriter
product, carrying the iron-clad Remington guarantee and embodying
just the qualities you need.

Of course you need a typewriter. Everybody needs one. The time saved
and the labor saved by the typewriter is worth saving by you and by everyone
who has writing to do. The price of the Remington Junior is \$65.00
cash with order. It differs from the standard Remington only in these
points. It is smaller, it is lighter, it is designed for the simpler uses, such
as manuscript and letter-writing. But for these purposes it has no superior.
Here then is your opportunity—your first opportunity—to buy an abso-
lutely first-grade typewriter at a low price. Better seize the opportunity and buy
now. You need not wait to buy until you get all the money, for we have arranged
special easy terms of payment.

For \$20.00 we will sell you a Remington
Junior on terms of \$5.00 down
and \$5.00 a month. Cut out the
attached coupon and send it to us
with \$5.00 in cash, check or money
order and we will send the machine.

Mark (X) in the proper square and sign your name
and address.
